DETAILED ACTION

1. Applicant's amendment and accompanying remarks filed February 3, 2006 have been acknowledged.

- 2. Examiner acknowledges amended claims 1, 5-7, 10, 19-20, 23, 25-26 and 29.
- 3. Examiner acknowledges cancelled claims 14-16.
- 4. Examiner acknowledges newly added claim 32.
- 5. The objection to claims 1, 20, 23 and 25 are withdrawn due to applicant's amended claims 1, 20, 23 and 25.
- 6. The rejection of claims 1, 5, 9-10, 20, 23 and 25 under Steckl et al., U.S. Pre Grant Publication 2002/0125821 is withdrawn due to applicant's argument.

Double Patenting

7. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re*

Vogel, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and In re Thorington, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

Page 3

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

8. Claims 1-13 and 17-32 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-15, 21-35 and 41 of copending Application No. 11/184,457. Although the conflicting claims are not identical, they are not patentably distinct from each other because both applications recite a phosphor laminate in a thick dielectric film electroluminescent device wherein the laminate comprises a rare earth activated alkaline earth thioaluminate such as barium thioaluminate activated with europium or cerium phosphor thin film layer and an aluminum oxynitride layer directly adjacent and in contact with a bottom of the phosphor thin film layer. Although the present invention recites aluminum nitride as the barrier layer, aluminum oxynitride acts as a barrier layer as well.

Additionally, aluminum oxynitride is in close structurally similarity as aluminum nitride and has similar properties such as keeping out moisture and air. Therefore, a prima facie case of

Application/Control Number: 10/736,020

Art Unit: 1774

Page 4

obviousness is made since aluminum oxynitride and aluminum nitride are in close structurally similarity in re Payne, 606 F.2d 303, 313, 203 USPQ 245, 254 (CCPA 1979).

This is a <u>provisional</u> obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Response to Arguments

9. Applicant's arguments with respect to claims 1-13 and 17-32 have been considered but are most in view of the new ground(s) of rejection.

Any inquiry concerning this communication or earlier communication from the examiner should be directed to Camie S. Thompson whose telephone number is (571) 272-1530. The examiner can normally be reached on Monday through Friday from 7:30 am to 4:00 pm. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rena L Dye, can be reached at (571) 272-3186. The fax phone number for the Group is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
